ud83cudf1fud83cudf1fud83cudf1fud83cudf1fud83cudf1f. WTF is this man, only on level 3 and got stuck about 10 times lol. Reminds me of boulder dash, be noted however that some people cannot get it to work and the steam forums are dead. Take a chance on it working and if it dont just get a refund people.. Nice game. Bought it because it reminded me of Boulderdash. My only gripe is the movement speed which feels too sluggish. It would be nice if I could adjust the speed.. boring game, I dont really get the sense of this game, but its cheap , so if you want to give it a try, its your choice. Nice game.
